PROFESSIONAL SUMMARY

Data Science Student with over **1.5 years of experience** in Business Intelligence, financial reporting, and data process automation. Currently **BI Intern at LVMH – Moët Hennessy**, consolidating data sources and generating reporting for decision-making. Proficient in **Python**, **SQL**, **Power BI**, and **ETL** processes. Experienced in data pipeline design, heterogeneous data source integration, and financial & commercial KPI visualization.

EDUCATION

Bachelor's Degree in Data Science

2022 – July 2027 (*expected*)

Escuela Superior de Computo (ESCOM) - IPN.

WORK EXPERIENCE

Business Intelligence Intern

February 2026 – Present

LVMH – Moët Hennessy

- Consolidate multiple financial and commercial data sources through **ETL** processes, ensuring dataset quality and integrity for corporate reporting
- Manage data file transfers via an **SFTP** application, guaranteeing timely data availability for the finance department
- Develop and maintain **Power BI** dashboards focused on financial and sales KPIs for the wines & spirits division
- Automate dataset cleaning and consolidation with **Python** and **SQL**, reducing data preparation time for periodic reports

Pricing Intern

February 2025 – February 2026

BP

- Optimized **Python** scripts for daily data processing, preventing the loss of 12,000 records per day and ensuring data integrity
- Designed new visualizations in **Power BI** dashboards and reorganized table structure (ETL) to optimize data transformation and presentation
- Developed and deployed a web scraping pipeline (**Selenium**, **BeautifulSoup**) on an **Azure** VM, automated with **Power Automate**, extracting 16,000 daily records and generating monthly savings of \$200 USD
- Adapted and rewrote an automation script (**Python/Selenium**) after a web update, reducing processing time from 4 hours manual to 1 hour execution

Data Analyst

September 2024 – February 2025

Smart Sponsorship Evolution

- Automated data extraction with **Python** and built an interactive **Excel** dashboard (pivot tables & macros), reducing report generation times
- Led the cleaning, standardization, and migration of the main database to a **SQL** server, designing a scalable relational architecture

SKILLS

Languages & Tools: Python, SQL, Git, Power BI, Tableau, Advanced Excel (Pivot Tables, Macros)

Data & ETL: Pandas, NumPy, Selenium, BeautifulSoup, MySQL, PostgreSQL, SFTP

Platforms & Technologies: Azure, Docker, Power Automate, GCS, GitHub, VS Code

LANGUAGES

Spanish – Native | **English** – Upper-Intermediate (Technical reading and professional communication)
